# GUIDELINES FOR B. TECH PROJECT REPORT PREPARATION

**Preamble**

The B.Tech Project is an important component of the undergraduate engineering curriculum, providing students with an opportunity to apply theoretical knowledge to practical engineering problems. It encourages students to develop skills in problem identification, literature review, experimental investigation, data analysis, and technical reporting. The project work also helps students enhance their creativity, analytical thinking, and ability to communicate technical information effectively.

Preparation of a project report is a crucial part of the project activity as it systematically documents the objectives, methodology, results, and conclusions of the work carried out by the students. A well-structured report reflects the quality of project work, the depth of understanding of the subjects, and students' ability to present their findings clearly and professionally.

These Guidelines for B.Tech Project Report Preparation have been developed to provide a uniform format and standard for preparing the project report. The guidelines aim to assist students in organizing their work in a logical sequence, maintaining academic integrity, and ensuring clarity, consistency, and professionalism in documentation. All students are expected to strictly follow these guidelines while preparing and submitting their project reports. Adherence to these standards will ensure uniformity across reports and facilitate effective evaluation by the project supervisors and examiners.

**1. Plagiarism Policy:**

The project report must maintain academic originality, with plagiarism not exceeding 20% and AI-generated content also limited to less than 20%, as per institutional guidelines. Students are required to ensure proper citation and referencing of all sources used in the report.

**2. Organization of the Project Report**

The project report should be organized into several chapters, beginning with an Introduction and concluding with a Summary and Conclusions. Each chapter should have a clear, appropriate title that accurately reflects its content. For greater clarity and a more systematic presentation, chapters may be further divided into sections and subsections as required. When the project includes two or more independent studies/internships, the report may be structured into separate parts, each with a suitable title. However, the chapter numbering should remain continuous throughout the entire report to maintain consistency and proper organization. The following should be the order of contents for the report.

I. Cover Page
II. First Page
III. College Certificate

IV. Company Certificate
V. Candidate's Declaration
VI. Acknowledgement
VII. Abstract
VIII. List of Figures (Format given at the end)
IX. List of Tables (Format given at the end)
X. List of Symbols, Abbreviations, and Nomenclature(Format given at the end)
XI. Table of Contents (Format given at the end)
XII. Chapters 1 to n
XIII. Appendix (optional)
XIV. References / Bibliography

**2.1 Instructions to be followed**

- **Cover Page and Title Page:** A specimen copy of the Cover Page and Title Page of the project report is provided in Appendix 1**.**
- **Certificate:** The certificate should be prepared with 1.5 line spacing, using Times New Roman font, size 12, as per the formats provided in Appendix 2 (Institute Certificate) and Appendix 3 (Company Certificate).
- **Declaration:** The candidate's declaration should be typed with 1.5 line spacing, in Times New Roman, size 12**,** as per the format given in Appendix 4.
- **Acknowledgement:** The acknowledgement section should be typed with 1.5 line spacing**,** using Times New Roman font, size 12.
- **Abstract:** The abstract should provide a brief synopsis of the internship/project report, typed with 1.5-line spacing, in Times New Roman, size 12, and include a maximum of 6 keywords. It should clearly state the objectives of the internship/project.
- **List of Figures:** The captions used in the List of Figures must be identical to those appearing below the figures in the main text. The content should be with 1.5 line spacing. A specimen copy is provided in Appendix 5. If a figure is reproduced from a published paper, book, or website, it must be cited appropriately.
- **List of Tables:** The captions listed must be the same as those appearing above the tables in the main text. The content should be typed with 1.5 line spacing. A specimen copy is provided in Appendix 6.
- **List of Symbols, Abbreviations, and Nomenclature:** This section should be typed with 1.5 line spacing and should include standard symbols, abbreviations, and nomenclature used in the report. A specimen format is provided in Appendix 7.

□ **Table of Contents:** The Table of Contents should list all sections that follow it as well as the relevant preliminary sections. The Title Page and Certificates should not appear in the Table of Contents; however, their page numbers should be indicated using lowercase Roman numerals. The content should be 1.5 line spacing. A specimen copy is provided in Appendix 8.

□ **Chapters:** The structure of chapters may broadly follow the format provided in Appendix 9**.** The main text of the report should be organized into several chapters, which may further be divided into sections and subsections as required.

- Each chapter must have a clear and appropriate title**.**
- Tables and figures should be placed as close as possible to the location where they are first referenced in the text.
- Footnotes should be used sparingly. When used, they should be typed with single spacing and placed at the bottom of the same page to which they refer.

**3. Project Report Format**

□ **Paper Size:** The paper size shall be standard A4; height 297 mm, width 210mm.

□ **Typesetting, Text Processing, and Printing:** The text of the report should be printed on single sides of the paper using a LaserJet or Inkjet printer. The document should be prepared using standard word processing software. The recommended font is Times New Roman, size 12, with 1.5 line spacing throughout the main text.

□ **Page Format:** The printed pages should follow the margin and layout specifications given below:

- Top Margin: 1 inch
- Bottom Margin: 1 inch
- Left Margin: 1.25 inch
- Right Margin: 1 inch

□ **Header:**

- Top-Right Corner: Chapter Heading
- Bottom-Left Corner: College of Technology
- Bottom-Center: Page number
- Bottom-Right Corner: Silver Oak University

□ **Pagination:**

- All pages in the report except the cover page must be numbered.
- All the page numbers should be located at the BOTTOM CENTER of the page.
- The page numbering starting from the declaration up to the table of contents should be numbered in small roman letters, i.e., i, ii, …

- The page numbering starting from the beginning of Chapter 1 up to the end of the report, should be numbered in Arabic numerals, i.e. 1,2, 3

□ **Color:** All the text including Tables should be Black. However, graphs and figures can have color.

□ **Font :**

- Chapter Headings: Times New Roman 16 pts, bold and all capitals
- Section Headings: Times New Roman 14 pts, bold and all capitals
- Subsection Headings: Times New Roman 12 pts, bold leading capitals (only first letter in each word should be capital
- Regular Text: Times New Roman 12 pts
- Special Text: Times New Roman Italics 12 pts (for foot notes, symbols, quotes, Mathematical notations….)

□ **Spacing/Alignment:** Use 1.5 spacing between lines of regular text. Use single spacing between: text corresponding to bullets, listing and quotes in the main body of text. Use double spacing between:

- Paragraphs
- Chapter title and section Heading
- Section heading and paragraphs
- Table Title and Table
- Figure Title and Figure

All paragraphs in the report are to be fully justified from the first line to the last line and should start from left without any hyphenation/indent. Text corresponding to bullets, listings and quotes in the main body of text should be indented.

□ **Section/Subsection Numbering**

- Section numbering should be left justified using bold print with Arabic numerals and decimals.
- Section numbering: < chapter.Section number> <3 blanks> Section heading Example: 1.1, 2.1
- Subsection numbering: < chapter.Subsectionnumber> Example: 1.2.1

□ **Equation/Formula**

Numbering for equation if necessary, should be done in the following format:

(Chapter number. Section number. Equation serial number)

Example: $y= ax^2 + bx + c$ (3.1.1)

□ **FIGURES:**

Figures should follow immediately after/on the immediate next page after they are referred to

for the first time in the text. Fi gure headings should be given at the bottom of the figure. However, numbering should be at the bottom of the report for the landscape page (similar to the next page). All figures are to be central aligned on the page.

Fig. <blank> Chapter number. Figure Serial number <3 blanks> Figure title (center aligned, leading caps)
Example:

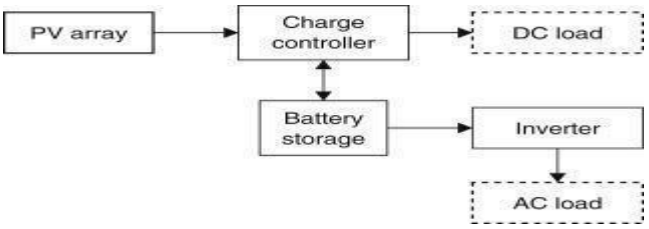

Fig 5.10 Solar PV System Block Diagram

□ **TABLES:**

Tables should follow immediately after/on the immediate next page after they are referred to for the first time in the text. Table heading should be given at the top of the table. However, numbering should be at the bottom of the report for the landscape page. All tables are to be central aligned on the page.

Format for Table heading: Table <blank> Chapter number. Table Serial number <3 blanks> Table Title (center aligned, leading caps)

Example: Table 5.18 Comparison of methods

| | | | | | |
|---|---|---|---|---|---|
| | | | | | |
| | | | | | |

□ **NUMBER OF COPIES:**

Each student/group must submit **two spiral-bound copies of the report**.

**[Industry Letter Head]**

# TO WHOM IT MAY CONCERN

This is to certify that <Student Name>, a student with Enrollment no._____, Sem 7th/8th, Department of [Department Name] of College of Technology has successfully completed his/her internship in the field of <Internship Area / Field> from <Start Date> to <End Date> (Total number of <xx> Weeks) under the guidance of <Industry Mentor>.

His internship activities include:

1. <Internship Activities>.
2. <Internship Activities>.
3. <Internship Activities>.

During the period of her/ his internship program with us, he / she had been exposed to different processes and was found diligent, hardworking and inquisitive.

We wish him every success in his life and career.

Authorised Signature with Industry Stamp

Designation:

_____

# DECLARATION

I/We hereby declare that the Advanced Programming with Project-I/Minor Project report submitted along with the Internship/Project entitled **<Title>** submitted in partial fulfillment for the Bachelor of Technology in <Branch or Specialization> to Silver Oak University, Ahmedabad, is a bonafide record of original work carried out by me/us at <Industry / College of Technology> under the supervision of <External/ Internal Guide Name>.

I/We further declare that the report does not contain any material previously submitted for the award of any degree or diploma in this or any other university. It is also certified that no part of this report has been copied from any source without proper acknowledgment, and all referenced materials, figures, and information from other sources have been appropriately cited in the report.

## Appendix 9 <Remove this>
## Details of Chapters (Sample)

1.0 Overview of the Company

- 1.1 History
- 1.2 Different product / scope of work
- 1.3 Organization chart
- 1.4 Capacity of plant

2.0 Overview of different plant/unit/department/shop of the organization and Layout of the production/process being carried out in company

- 2.1 It includes the details about the work being carried out in each department.
- 2.2 List the technical specifications of major equipment used in each department.
- 2.3 Prepare schematic layout which shows the sequence of operation for manufacturing of end product.
- 2.4 Explain in details about each stage of production.

3.0 Introduction to Project / Internship and Project / Internship Management

- 3.1 Project / Internship Summary – Key To a good summary is the FIRST sentence, which MUST contain the most essential information that you wish to convey.
- 3.2 Purpose
- 3.3 Objective
- 3.4 Scope (what it can do and can't do)
- 3.5 Technology and Literature Review
- 3.6 Project / Internship Planning
  - 3.6.1 Project / Internship Development Approach and Justification
  - 3.6.2 Project / Internship Effort and Time, Cost Estimation
  - 3.6.3 Roles and Responsibilities
  - 3.6.4 Group Dependencies
- 3.7 Project / Internship Scheduling (Gantt Chart/PERT/Network Chart)

4.0 System Analysis

- 4.1 Study of Current System
- 4.2 Problem and Weaknesses of Current System
- 4.3 Requirements of New System
- 4.4 System Feasibility
  - 4.4.1 Does the system contribute to the overall objectives of the organization?
  - 4.4.2 Can the system be implemented using the current technology and within the given cost and schedule constraints
  - 4.4.3 Can the system be integrated with other systems which are already in place?

- 4.5 Activity / Process in New System / Proposed System
- 4.6 Features of New System / Proposed System
- 4.7 List Main Modules / Components / Processes / Techniques of New System / Proposed System
- 4.8 Selection of Hardware / Software / Algorithms / Methodology / Techniques / Approaches and Justification

5.0 System Design

- 5.1 System Design & Methodology
- 5.2 Database Design / Data Structure Design / Circuit Design / Process Design / Structure Design
- 5.3 Input / Output and Interface Design (If applicable)
  - 5.3.1 State Transition Diagram (optional)
  - 5.3.2 Samples of Forms, Reports and Interface
  - 5.3.3 Access Control / Mechanism / Security (If applicable)

6.0 Implementation

- 6.1 Implementation Platform / Environment
- 6.2 Process / Program / Technology / Modules Specification(s)
- 6.3 Finding / Results / Outcomes
- 6.4 Result Analysis / Comparison / Deliberations

7.0 Testing

- 7.1 Testing Plan / Strategy
- 7.2 Test Results and Analysis
  - 7.2.1 Test Cases (test ID, test condition, expected output, actual output, remark)

8.0 Conclusion and Discussion

- 8.1 Overall Analysis of Internship / Project Viabilities
- 8.2 Dates of Continuous Evaluation i.e Internal Review 1 & Review 2
- 8.3 Problem Encountered and Possible Solutions
- 8.4 Summary of Internship / Project work
- 8.5 Limitation and Future Enhancement

The above mentioned chapters are just the reference; the final version should be modified and confirmed in accordance with your individual internal guidelines.
